
Sturla Bragason

“I’m Winston Wolfe. I Solve Problems.” — *Winston Wolfe, Pulp Fiction*

I am a methodical problem solver, no-nonsense communicator, and tactful diplomat. For the past decade I have led my colleagues consistently to success as the go-to engineer and hands-on architect.

Positions

Principal Platform & AI Engineer — Aeven

2025 - Present

Building Aeven’s new hybrid-cloud infrastructure platform from scratch.

Principal Architect (Cloud, DevOps, & AI) — Devoteam

2020 - 2025

Built modern cloud platforms as code for enterprise clients.

Senior Consultant & Infrastructure Trainer — Omada

2018 - 2020

Deployed Omada’s platform for clients and ran a monthly infrastructure course I wrote for partners.

Technical Consultant & Azure Specialist — Wise

2017 - 2018

Deployed Wise’s platform on Azure and helped clients solve complex technical problems.

My approach

I am a cloud-native platform engineer. I focus on open-source best practices and vendor-neutral solutions. My approach to architecture is lean, uncluttered, and minimalist so that it is easy for the whole team to manage. I use a divide-and-conquer style to break down complex backlogs into clear, actionable tasks. Any work I do creates tangible outcomes; code, diagrams, or documentation that ensure everyone knows exactly how to move forward.
